

Adjusted Sales of Fuel Oil and Kerosene in 2008

Tables 13 through 24 contain estimates of distillate fuel oil that have been adjusted at the PAD district level to equal published EIA volume estimates of petroleum products supplied in the U.S. marketplace. The kerosene and residual fuel oil sales estimates have been adjusted at the national level. The products supplied estimates can be found in the 2004 through 2008 issues of the *Petroleum Supply Annual, Volume 1 (PSA)*. In addition, electric power generation data and on-highway diesel data are used in lieu of adjusted survey results. See "Technical Note 3" in Appendix A for further explanation of data adjustments.

Total domestic adjusted sales of fuel oil and kerosene decreased 7.2 percent from 75.9 billion gallons in 2007 to 70.4 billion gallons in 2008. Adjusted sales of distillate, kerosene and residual fuel oils decreased 5.7, 55.6 and 13.7 percent respectively in 2008.

NOTE: The 2007 adjusted numbers have been revised since they were first published in the *Fuel Oil and Kerosene Sales 2007*. The revisions to the data were made to include new distillate and residual volumes for "Electric Power". When we originally published the *Fuel Oil and Kerosene Sales 2007*, the "Electric Power" information was still being collected and verified.
